

The Carbon Chronicle

VOLUME 35: No. 4

ACME, ALBERTA, THURSDAY MARCH 1st, 1956

\$1.50 a Year; 5c a Copy

A community meeting was held Monday, Feb. 27th at 8 p. m. in the Scout Hall with Ted Schmidt in the chair. The discussion was in regards to a resident and permanent Doctor for Carbon & District. Mr. Steeves

NOTICE

PREPARATION OF ASSESSMENT ROLL 1956 VILLAGE OF CARBON

Notice is hereby given that the assessment roll of the said Town or Village, made under the provisions of the Assessment Act, has been prepared and will for thirty days be open to inspection at the office of the Secretary-Treasurer of the town or Village, from ten o'clock in the forenoon until four o'clock in the afternoon on every day not a public holiday except Saturday, and on that day from ten o'clock in the forenoon until two o'clock in the afternoon, and that any person who desires to object to the entry of his name or that of any other person upon the said roll, or to the assessment of any property, or to the assessed value placed upon any property must within thirty days from the date of this notice lodge his complaint in writing with the Secretary-Treasurer of the Town or Village.

Dated this first day of March, 1956.

S. F. Torrance,
Secretary-Treasurer.

outlined the terms of contracts we would be called upon to make in order to support a Doctor. Dr. Walker then said we would have Dr. Bullard of Sask. for one year sponsored by the Drumheller Clinic. He is a married man with one child. It is up to all in the community to get out and support the Dr. in order to hold him here. Contracts will be \$50.00 with services outlined by Dr. Walker and will be directed under the Drumheller Clinic. Dr. Walker said to please give this man all your business and don't go out of town to other points, as if he is not supported he will leave and that will be the end of any effort whatever on the part of the Community Council as far as this subject is concerned. As you know we are in dire need of medical aid, so let's all get behind the project and put it over. Back your Council.

The Home and School Assoc. held its regular monthly meeting March 1st with Pres. Leo Trepanier in the chair. The meeting opened with the singing of O Canada. The minutes were then read and approved. Mrs. S. Garrett was nominated delegate for the H.S.A. Convention to be held in Edmonton May 9 to 11th. Next week being educational week, Mr. Appleyard announced that parents are invited to see the pupils in class on two days next week to see how they are taught, etc. on Thursday morning at 9 a.m. in the old school and at 9 a.m. Friday in the new school. Please be on time as coming late causes confusion.

The Amatetur Show being sponsored by the H.S.A. will be held Friday, April 13th. With no further business the meeting was then turned over to the entertainment committee, Irene Woods, who introduced Mrs. Roberts, President of the Drum-

heller Cancer Society and also on our hospital board. Many things were outlined. Questions answered and films shown on cancer, and we must thank Mr. and Mrs. Roberts for their very inspiring and interesting address. Mr. Roberts also spoke on Cancer, and I am sure all that we were doubtful about was very clearly explained. Mrs. Per man then moved the meeting adjourn. After the singing of the Queen a delightful lunch was served.

The Duke of York Chapter I. O.D.E. held their Annual Meeting on Feb. 6th at the home of Mrs. Sam Garrett.

The annual reports were adopted as read by the following officers:
Mrs. Albert Bramley Treasurer; Mrs. Ed Ohlhauser, Educational Secretary; Mrs. Leon Coates, Services at Home and Abroad; Mrs. Sam Garrett, Empire and World Affairs; Mrs. William Downes, Film Report; Mrs. Cliff Hood, Membership; Mrs. Sidney Bramley, Publicity.

The scrapbook was displayed showing activities of 1955.

The election of officers then took place and the new slate of officers for 1956 is as follows:
Mrs. Ben Fox.....Regent
Mrs. Les Bramley.....1st Vice
Mrs. Sydney Bramley.....2nd Vice
Mrs. Earl Ohlhauser.....Secretary
Mrs. Norman Nash.....Treasurer
Mrs. Ed Ohlhauser, Educational Secretary; Mrs. Albert Bramley, Echoes Secretary; Mrs. Earnest Fox, Standard Bearer.

The annual general meeting of the Carbon Old Timers Association was held on February 15th at 3 p.m. when the following officers were elected:

President.....C. H. Nash
Vice-President.....W. M. Douglas
Secretary-Treas. W. A. Braisher
Executive Committee: W. J. Poole, James Gordon, L. F. Poxon, L. E. Halstead, Jack Gordon,

W. A. Downe, V. Luft, C. H. Nash, W. M. Douglas, W. A. Braisher.

Auditors, S. F. Torrance and Len Poxon.

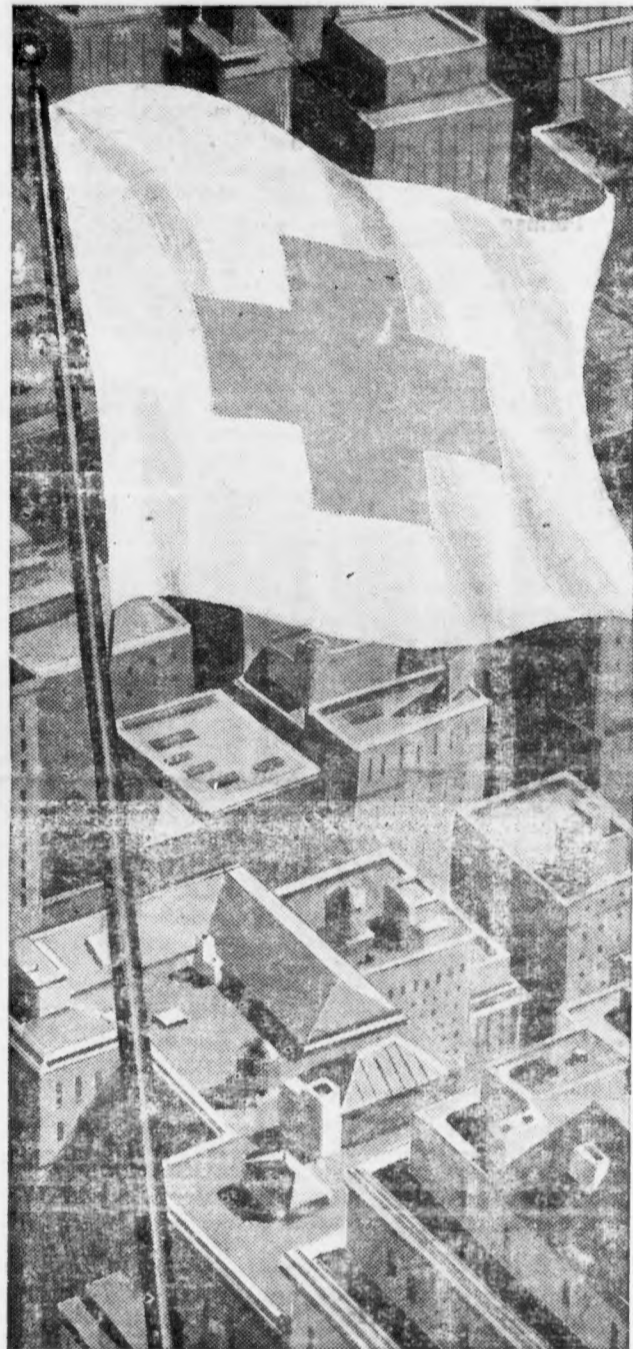

The Auditors' Report showing a balance in hand of 259.38 was read and adopted.

A number of letters were read thanking the Old Timers Association for flowers sent to members while hospitalized or

during sickness.

It was decided to hold a Social for Old Timers on March 15 to consist of Whist Drive, Entertainment and some Old Time Dances, and the following committees were appointed.
Hall, C. H. Nash.
Membership, F. J. Bessant.
Door, Syd N. Wright and S. F. Torrance.

Thought drowned, 78-year-old woman returned after 45 years

A 78-year-old woman "returned from the dead" has been welcomed by relatives and friends in a joyous reunion on crowded Central Railway Station at Sydney, Australia.

The woman, Mrs. Margaret Leroy, left home 45 years ago. Her father told his six children she had been drowned when the old steamship Waratah sank without survivors in the Indian Ocean during the fierce storm of 1909, and they believed it.

But Mrs. Leroy was not a passenger on the Waratah, and said she sailed to Perth, West Australia, on another ship in 1910.

She said she tried to book her passage on the Waratah, but the ship was "booked out", so she decided to sail to West Australia in the steamer Katoomba, which left Sydney six months later.

"By missing the Waratah, fate was kind to me. I suppose you

could say I missed almost certain death," said Mrs. Leroy.

Mrs. Leroy explained she had not contacted her relatives since 1910 because "I did not like writing letters."

Three weeks ago she asked police in Perth to trace her relatives. They did, and her four sisters and two brothers, who are still living in N.S.W., were overjoyed to learn their long-lost sister "Lottie" was still alive. They asked her to come to Sydney and visit them.

A little gray-haired old lady wearing a bright red coat smiled brightly as she stepped off the Melbourne Express.

"There she is," cried her sister, 64-year-old Mrs. Muriel Tighe as she rushed along the platform to greet Mrs. Leroy whom she had not seen since 1910.

"This is the best present I've ever had," said Mrs. Tighe as the two women tearfully embraced. "You're so different from when I last saw you... but I still recognize you," she told Mrs. Leroy.

Mrs. Leroy, who was only 32, and according to friends "very beautiful" when she left Sydney, married a young Frenchman in Perth, West Australia, two years later. She said her husband was killed in active service in World War I. She "battled on" by herself working as a cook in a boarding house until doctors ordered her to retire two years ago.

Almost overcome with excitement she told how that loneliness had driven her to seek her relatives.

"I felt so alone that I was becoming depressed."

"It's wonderful to be home again, I don't think I'll ever leave Sydney," she added.

Strictly Fresh

Women on Chicago's election board were ordered recently to leave their girdles at home on certain days. Officials wanted to run lie detector tests in connection with investigation of a scandal. Said girdles cut down rate of breathing, an important indication read by the machine. Without girdles, who needs a lie detector to chart the gals' true outlines?

Every year's a leap year when the gal's determined and the fellow's naive enough to think that he does the chasing.

Fellow across the desk from us says that the only thing he wants to plant this spring is the sales-

man who sold him the shrubs he planted last spring.

A wet dishrag is as spruce as a general's parade uniform if compared to the mixed salads served in many restaurants.

The character who originated the phrase, "as easy as taking candy from a baby," never tried to pull the taffy over our infant's eyes.

Mice do not prefer cheese

A University of Minnesota expert says householders would be doing better to bait their mouse-traps with strawberry jam than with the traditional cheese.

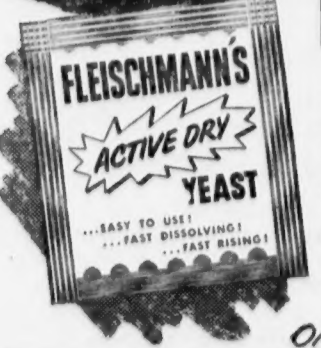

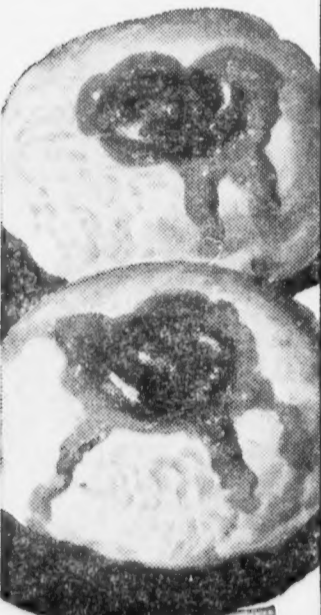

Herbert L. Parten, an extension entomologist, says, in fact, that mice don't particularly like cheese. Parten has been studying dietary habits of mice for 30 years with a view to learning the best way to exterminate them.

"Among mice in my laboratory, peanut butter is a big favorite," Parten said. "Bacon rind and raisins also are popular."

But the mouse expert said the food mice really go for is strawberry jam.

"People just don't realize that mice have a sweet tooth," Parten said.

They're amazing good Made with Amazing New Active DRY Yeast!

JELLY BUNS

Measure into small bowl, 1 c. lukewarm water, 2 tps. granulated sugar; stir until sugar is dissolved. Sprinkle with 2 envelopes Fleischmann's Active Dry Yeast. Let stand 10 min., THEN stir well. Cream 3/4 c. shortening; gradually blend in 1 c. granulated sugar, 2 tps. salt, 1 tsp. grated nutmeg. Gradually beat in 2 well-beaten eggs. Stir in 1/2 tsp. lemon extract, 1/2 c. milk which has been scalded and cooled to lukewarm, and yeast mixture. Stir in 3 c. once-sifted bread flour; beat until smooth. Work in 3 c. more once-sifted bread flour. Knead until smooth and elastic; place in greased bowl and brush top with melted butter or shortening. Cover and set in warm place, free from draught. Let rise until doubled in bulk. Punch down dough and cut into 36 equal portions; knead into smooth balls. Brush with melted butter or margarine, roll in fine granulated sugar and arrange 1/2" apart on greased baking pans. Cover and let rise until doubled in bulk. Twist the handle of a knife in the top of each roll to form an indentation; fill with jelly. Cover and let rise 15 min. longer. Bake in moderately hot oven, 375°, about 18 min.

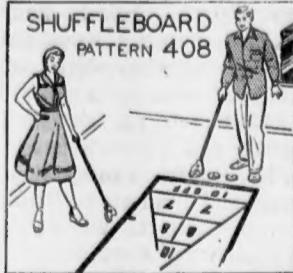

• No more disappointments because the yeast has spoiled! Fleischmann's Active DRY Yeast replaces old-fashioned perishable yeast because it keeps fresh and full strength—right in your cupboard! For fast-rising dough and grand oven results get Fleischmann's Active DRY Yeast to-day!

MAKE THESE

Shuffleboard game and Lazy Susan

Shuffleboard is an old favorite among indoor games. It is easy to lay out a permanent court on the rumpus-room floor or the porch. If space is not available the court may be painted on canvas to be rolled up and brought out as wanted. Pattern 408 gives dimensions and directions for making the court, disks, cues and score board. The pattern also gives directions for making the gadgets used in two other indoor games. If you are an indoor fan, you may want to order the rumpus-room game packet containing five patterns each with directions for one big game and two small games. Price of packet is \$1.50.

No more, "... please pass the sugar, salt, relish, bread..." with this lazy susan on the table. It may be cut out of plywood with a base of solid stock and assembled in an evening. The pattern also gives variations of the design which may be used for parties and a holiday centerpiece. One is a 4-sided tree cut out of thin plywood to stand 6-inches high and hold lollipops, candy on toothpicks, stuck into the four sides of the tree. There is a 6-inch high brightly painted figure to stand in the centre to hold a dish of goodies. These are specials for the holidays but the lazy susan is a handy piece the year 'round. Pattern 422 is 35c.

Treherne club wins Exchange calf trophy

The Winnipeg Livestock Exchange trophy goes this year to the Treherne 4-H Beef Calf Club, it is announced by Frank Muirhead, Supervisor of 4-H Clubs in the province. The 12 members of the Treherne Club are under the leadership of Eric Green and Jim Hird.

The Boissevain club are reserve champion winners, with Shoal Lake in third place.

Manitoba 4-H Beef clubs made a new record in 1955, with 124 clubs and 1,725 members completing the program. Twenty-one organized inter-club shows and sales were held during the past summer, at which an average price of \$19.71 per cwt. was obtained for calves.

Total value of the 1,067 calves marketed by the clubs at shows and sales during the year is estimated at \$258,000. Records show that 87 percent of the calves sold were graded A or B on the rail.

Rene Maguet of St. Rose du Lac was awarded the Winnipeg Livestock Exchange trophy for highest carcass score of 98 percent. He also received a special prize of \$50 for winning the award with his Angus Steer, champion at the Dauphin inter-club show and sale.

The program of the Beef Calf clubs includes educational activities, judging competitions, construction of displays, public speaking and other activities which give members valuable training in agriculture and citizenship.

Other clubs among the top 10, in addition to the Treherne, Boissevain and Shoal Lake teams are: Basswood, Carberry, Rapid City, Cypress River, Turtle Mountain, Birtle and Manson.

Glowing future for housewives, it says here

The home of tomorrow will have kitchens where cooking will be strictly a hobby, and beds that need never to be made.

That's the glowing future for Mrs. Homemaker pictured by Jay Doblin, director of the Illinois Institute of Technology's design department.

Doblin told the Illinois Tech Women's Club that the large kitchen equipped with many appliances will be obsolete within 10 years. He said cooking methods which enable airline stewardesses to cook meals for 60 people in less than 10 minutes will be translated to modern homes.

"Soon we will have compact radio-frequency cooking units in our homes," he said. "We will probably see the day when cooking, as we now know it, will be considered strictly a hobby."

Doblin's bed of tomorrow will have a radio-frequency heating unit. It will encircle the sleeper and keep him comfortably warm no matter what the outside temperature, he said.

The bed would fold away automatically and be sterile cleaned when not in use, he said.

Choice of holes in Swiss cheese

The Book of Knowledge says that the holes in Swiss cheese have now become such an accepted feature that different races favor cheese with holes of different sizes. The French like them small, the Italians like them medium-sized, and on this continent Swiss Cheese with large holes is the usual choice.

Apparently the Swiss like all sizes! The holes, which serve no particular purpose, are air-bubbles formed during the kneading and stirring that goes on in manufacture, while the cheese is still plastic.

Only 15 names on fodder list

REGINA.—The first surplus fodder list compiled by the plant industry branch of the department of agriculture this winter has been released to municipal, L.I.D., and agricultural representative offices in the province, R. E. McKenzie has announced.

Only 15 names appear on the list indicating that relatively few farmers are offering feed for sale. Fourteen of the listings are from Saskatchewan and one is from Manitoba. The fact that only a limited quantity of feed has been located to date indicates that farmers with fair supplies are probably looking quite carefully at this feed for their own needs in the event the present winter continues long and severe.

Mr. McKenzie advised farmers and stockmen to begin feeding some grain with roughage where supplies are short. Six pounds of ground grain per day will replace eight to 10 pounds of hay. In this way livestock will enjoy a better balanced diet and often at lower costs than buying hay.

Other lists of available fodder will be compiled and sent out as soon as more listings are received. Anyone who has feed for sale is asked to send his name, location and price immediately to the local Agricultural Representative, office of the rural municipality or to the Department of Agriculture at Regina.

The department has limited quantities of feed in provincial fodder reserves located in the southern part of Saskatchewan. Mr. McKenzie said, but these will not be released until a severe emergency feed situation exists.

Funny and Otherwise

Engine trouble forced an airplane pilot to bail out. On his way down he met an old lady floating up.

"Hey," he shouted, "did you see a plane going down?"

"No," replied the old lady.

"Did you see a gas stove going up?"

The pretty young teacher was instructing her grammar class in the conjugation of the verb "to love."

"Bobby," she said, "Can you tell me what it is when I say, 'I love, you love, he loves,?'"

"That," said the precocious little fellow, "is one of them triangles where somebody gets shot."

A junk dealer was driving his dilapidated horse and wagon across the Triborough Bridge and was horrified to discover that he had to pay a twenty-five cent toll. "A Rulls-Royce yet they think I am," he muttered angrily. When he returned the following day the old horse was sitting in the wagon, and the junk dealer was pulling it.

"Where's your quarter toll?" asked the guard.

"Dun't come to me," said the dealer. "Esk de driver."

What's that piece of string tied round your finger for, Bill?"

"That's a knot. Forget-me-not is a flower. With flour you make bread, and with bread you have cheese. This is to remind me to buy some pickled onions."

TOMORROW

Tomorrow sings
A tune so finely wrought
And flung on such transparent wings
The cadence can't be caught.
Tomorrow gleams—
A brook's song on a stone,
A dream awaiting unborn dreams
A thought half known.
Tomorrow dances
And strange pipers play.
But the notes bring backward glances—
The song is of today.

—William D. Dorrity
The New York Times

All but a few of the meteors that fall on the earth burn out as they reach the upper layers of the atmosphere.

UNWELCOME BRUIN

The bear went over the mountain on the volcanic isle of Oshima, off Tokyo Bay 19 years ago. He was the only bear Oshima ever had. He was an attraction at the island zoo until he staged a break. Oshima was sorry to see

him go. Now they are sorry to see him, period. Swelled to 320 pounds (weight estimated from a safe distance), the bear has been breaking into homes.

The first normal school in the world was established in Vermont.

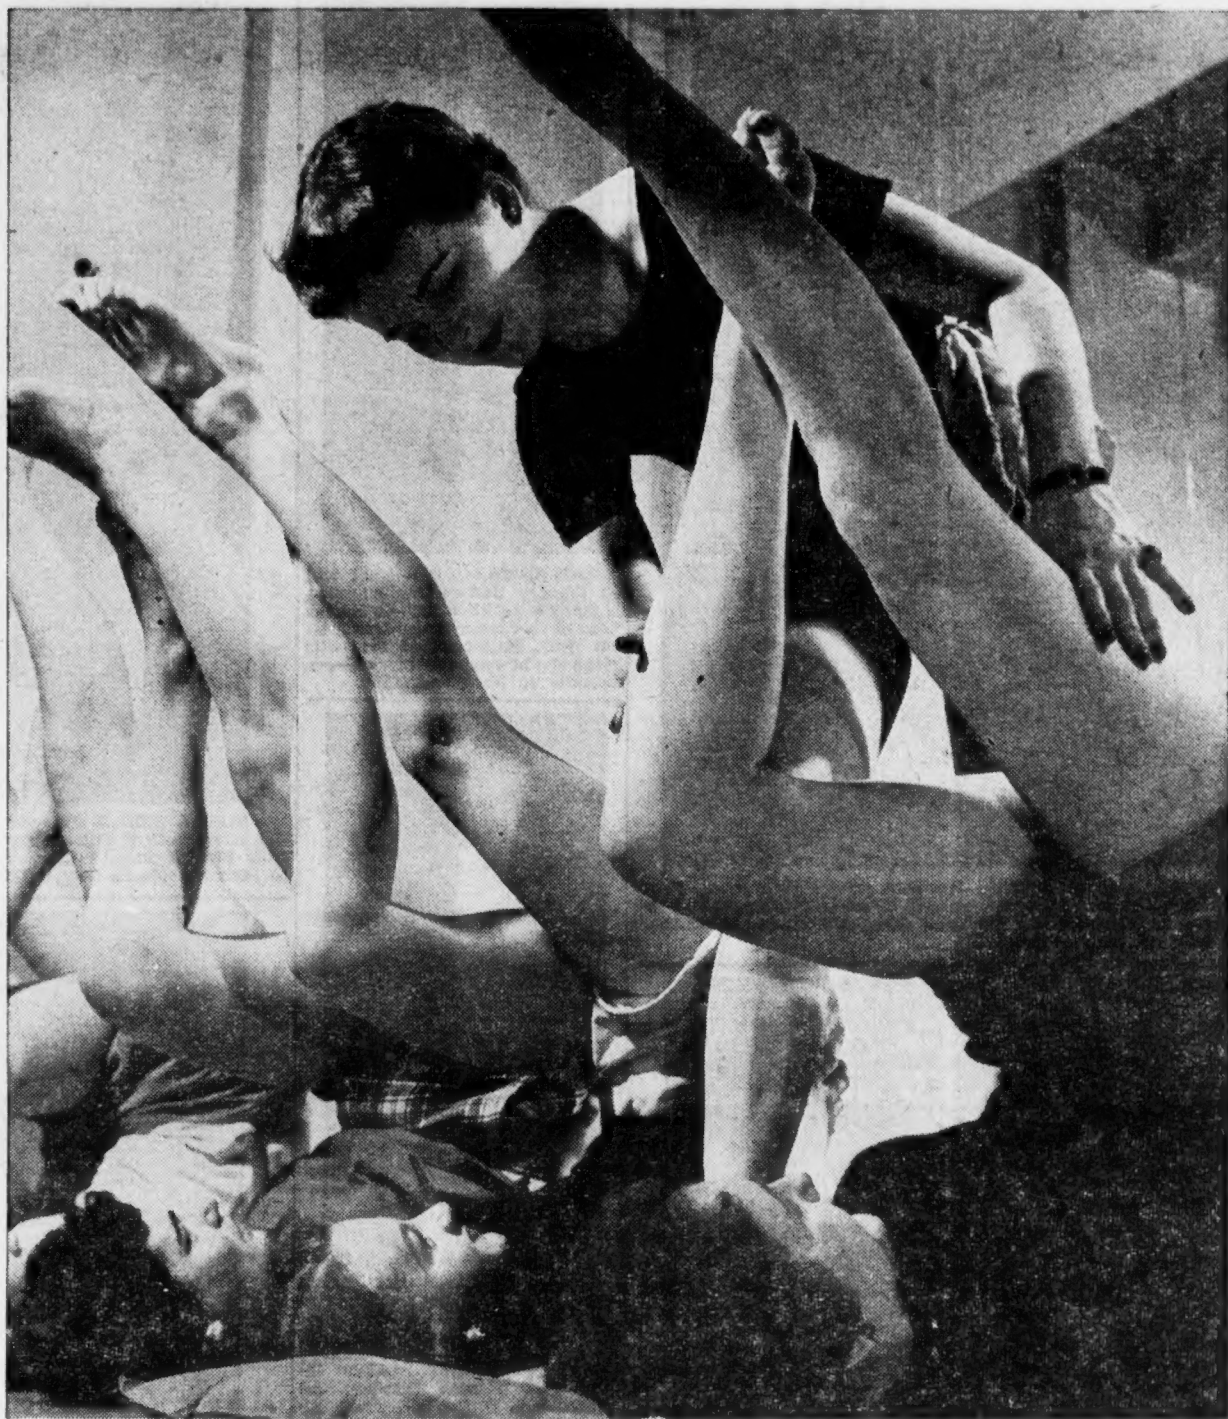

COULDN'T STAND IT

Spokane's howling air raid siren touched off a deafening wail from six dozen dogs at the Humane Society and drove a dog catcher right out of the building. A. N. McPhee said he couldn't stand the noise from the dogs when the big

siren went off in a test blast. The siren is on top of a building about 10 blocks from the pound.

White is the traditional color of mourning in Korean families. The color is worn three years for close relatives.

'Charm' schools a \$2 million business

Sparked by a phenomenal boom in beauty since the war's end, Canadian "charm" schools are today doing a thriving \$2 million dollar business, teaching glamour secrets of make-up, proper carriage and wardrobe to potential career models and housewives alike. So great is the self-improvement trend that, in the Toronto area alone, some 8,000 women last year spent \$400,000 on commercial and YWCA courses designed to make them prettier on

the fashion runway or in the kitchen. "Riding bicycle", these students take figure slimming exercises under supervision of instructress-model Hilda Land. Figure streamlining course is aimed at correcting figure defects brought about by insufficient exercise, poor posture and wrong diet. Ultimate goal: the ideal symmetry of a perfect 34"-24"-34".

National Film Board Photos by Chris Lund.

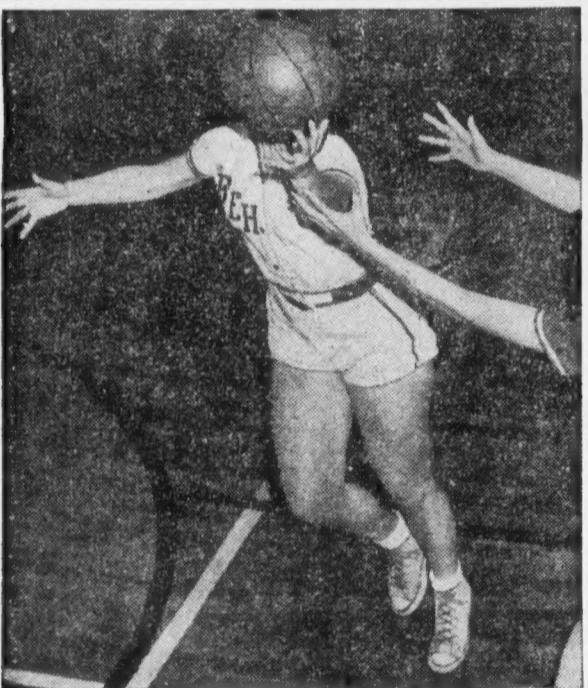

Poise and proper carriage, important social as well as modelling assets, are an integral part of charm school training. Teen-age students watch as teacher Lois Piton (herself "Miss By-Line of '52"), puts students through paces in simulated runway work. Cost of general course in commercial schools averages \$80.00.

Advice on clothing and accessories, designed to suit individual purse and personality, are given these beginning students. Tips on use of fabric and color, design, employment of accessories, prove invaluable to both housewives and models taking course. Here, instructress Jeannine Mallinson advises on millinery styles.

World Happenings In Pictures

SLAPBOARD DAREDEVIL—Vermont ski pro Fritz Prohl, shows how to take the fast slopes on one leg. He doesn't suggest this for the beginners, but practices the stunt daily, sometimes taking some of the toughest runs on one leg.

"COME TO ME"—The lady cager, at right, isn't longing for "Mr. Basketball". She just wants to snatch her opponent ball-headed. Obscured by the ball is the pretty face of Erlanger Hospital's Nurse Jaynet Pruiett, playing in a Civic League game at Chattanooga, Tenn.

BIGGER HAIRDOS FROM PARIS—Paris stylist Carita Alexander has dreamed up a new hairdo for those who are tired of chopped up Italian haircuts. Above the German dancing twins Alice and Helen Kessler model a new Oriental inspired coiffure which fluffs the hair up and away from the forehead and lets it fall full at the sides. Hats and hairdos are the big news at the current Paris fashion shows.

MAN OVERBOARD—That will be the cry this coming summer, if many sea sprites such as Norma Seward up-anchor under transparent sails. Fashioned of synthetic resin, the new-type sail was shown recently in New York City.

LAST LAUGH—French artists put the finishing touches to papier mache figures which will swirl through the gayety of Mardi Gras time at Nice. The world-famous, week-long carnival reaches its climax on Shrove Tuesday, the eve of Ash Wednesday, when the penitential season of Lent begins.

TODAY—No spaceman, he. The mask protects this maintenance worker at Portsmouth, N.H., Air Force Base from New England's bitter winter gales as he keeps road facilities open with his road grader.

TOMORROW

Tomorrow sings
A tune so finely wrought
And flung on such transparent wings
The cadence can't be caught.
Tomorrow gleams—
A brook's song on a stone,
A dream awaiting unborn dreams
A thought half known.
Tomorrow dances
And strange pipers play.
But the notes bring backward glances—
The song is of today.

—William D. Dorrity
The New York Times

ROYAL SMILE—Princess Anne reflects her mother's smile as she drives with the Queen from the station on her return to London from Sandringham. Princess Anne and Prince Charles said goodbye to their parents as they left for Nigeria.

TOKYO ROSE—Mrs. Iva Ikuko Toduri D'Aquino, better known as "Tokyo Rose", the honey-voiced Japanese radio broadcaster who appealed to Allied troops to desert during World War II, leaves Federal probation office in Chicago. Mrs. D'Aquino got the terms of her probation from Ben S. Meeker, who told her she will have to report once a month.

SHE'D WALK A MILE FOR HIM—So the ecstatic expression on the lady camel at right would indicate. But the blissful bactrian at left had better head for the oasis. She'll make him wait for a date unless he promises love that will endure until the sands of the desert grow cold. This early spring nonsense is going on at the zoo in Paris, France.

WEEKLY BIBLE COMMENT

TIME NEARS FOR JESUS TO GIVE HIMSELF

Lent is almost upon us. Ash Wednesday, February 15, marks its advent, and it is a good time to meditate upon the ministry of the life of Jesus.

He said concerning himself: "The Son of Man came not to be ministered unto, but to minister, and to give His life a ransom for many."

One aspect of that life might be summed up in the saying: "He went about doing good." But that was only one aspect. Jesus was not only a doer of good, a minister bringing help and comfort, blessing as He went about Galilee and Judea.

His ministry was to go far beyond his earthly life. It is everlasting in its nature.

The significance of Jesus is the Gospel which He brought to men. Christian ministers of today are called "ministers of the Gospel," and happy is the church and community that has as its religious leader a true minister of the Gospel.

Jesus brings the news of God's grace to men, and of that grace there is no limitation in availability nor in effectiveness.

Jesus' courage was as sublime as His faith and His graciousness. He who warned His disciples to "beware of men" had no fear of men or of what men might do to Him.

Jesus, the archetype of ministers, was concerned only in finishing the work that the Father had given Him to do.

Now is the time to meditate on the life which leads to the cross and to an undreamt of glory which lies behind the shadow.

Quality potatoes from storage

Potatoes that become watery or mushy when cooked have probably been stored at the wrong temperature.

L. G. Denby of the Experimental Farm at Summerland, B.C., advises that potatoes should be stored in a dark well ventilated storage, fruit cellar or pit in which the temperature can be held at 38 to 40 degrees Fahrenheit. The humidity of the air should be 80 to 90 percent. Under these conditions most late varieties will remain in sound condition throughout the winter.

Potatoes should not be used immediately after they are removed from storage conditions. If stored at a low temperature, a high proportion of the carbohydrates in the tuber are converted to the form of sugars. Potatoes in this condition are inclined to be sweet and almost always watery when cooked. Potatoes should be removed from storage and kept in a warm place at temperatures of 70 to 80 degrees Fahrenheit for a week or 10 days before they are prepared for the table. This higher temperature will cause the sugars to change into starches. When cooked they will be white and floury and appealing to the sight as well as to the taste.

Quick Canadian Quiz

1. In 1901, 37 percent of Canadians lived in the country's incorporated cities, towns and villages. What is today's percentage?
2. Canada now ranks first in the world in the import of commodities of what kind?
3. What is the population of the Yukon and Northwest Territories?
4. The Mounties have had what three different names?
5. Which department of the federal government employs the greatest number of civil servants?

ANSWERS TO QUICK QUIZ
5. The defence department. 3. 25,000. 1. 57 percent. 4. North West Mounted Police, Royal North West Mounted Police, Royal Canadian Mounted Police. 2. Manufactured goods.

The Sports Clinic

(An official department of Sports College)
Conducted by Lloyd "Ace" Percival

A basketball shooting hint

Sports College often is asked if it is true that practicing shooting with either hand cuts down your ability to shoot with your normal hand.

We usually answer this question as follows. If sufficient time is spent practicing both right and left hand shooting, then it's a good idea, because the man who can shoot with either hand has a great advantage. But if the practice sessions are short, then it is best to concentrate on developing the shooting skill of your best hand. To develop skill takes time, and when you are facing a problem such as this the only thing to do is to make the time at your disposal the deciding factor.

Some coaches whose success makes it important to give their ideas careful consideration claim that once the team is selected at least 60 percent of practice time should be spent on shooting.

The individual player can get in extra practice by rigging up a basket in his garage or basement.

HIGHEST NAVIGABLE RIVER
The St. Joe river in Idaho is the highest navigable river in the world. It's in the area of the largest stand of white pine in the United States.

Such a move may make all the difference between being average and outstanding player, because it will give the player a chance to practice with either hand -- a move that will greatly increase the scoring potential of anyone who learns this skill.

Should you drink milk before games?

Another question that is very often asked of Sports College staff members is whether it is a good idea for athletes to drink milk as part of their pre-game meal. It's been a tradition in many sports for some time to remove milk from this particular meal, particularly when the athlete is competing in an event demanding endurance of any kind.

However, this idea has no basis in fact. Milk actually is a very excellent food to include at this time. It is easy to digest, provides energy in the form of lactose sugar and helps you sustain a feeling of physical vigor because it is a high protein food.

If you like milk, we recommend that by all means you include it as part of any meal--before or after sports activity. Some athletes prefer skim milk at this time because it is even easier to digest than whole milk.

Metal leggings protect hunters

Men wearing something similar to shiny stove pipes on their legs while tramping the fields around Arcadia, Florida, are no longer an unusual sight.

They are using Alvie Twiss' aluminum leggings, designed to protect hunters and outdoorsmen against fangs of poisonous snakes. Twiss began making the leggings after he missed by one step a coiled and angry rattlesnake.

The leggings extend above the wearer's knees in front and are lower in the back to allow the leg to bend. At least three persons have told Twiss they were struck without harm by rattlers while wearing the metal protectors.

Funny finale to piano concerto

A piano concerto had just been completed at Houston, Texas, and the 3,000 spectators watched with interest as two stagehands came out to move the piano.

One started to shove it--and the left front leg came off in his hand. There was a nervous spasm of giggles as he struggled to support his corner of the piano. The giggles erupted into a roar as a third man ran on stage to help the two.

The sell-out crowd may have noticed Symphony director Leopold Stokowski turn a fraction on the podium to see what was up. But only the three stagehands heard his smiling crack: "Comedians!"

Ticklers

Here's the Answer

Ten Word INTELLIGRAM

Check the correct word:

- 1—Severe rioting recently occurred in (Iran) (India).
- 2—It was over redistricting of states on a (political) (language) basis.
- 3—Sen. William Knowland (has) (has not) been entered in a presidential primary.
- 4—Tragic California train wreck involved a (diesel) (steam) train.
- 5—It occurred in (Los Angeles) (San Francisco).
- 6—More than (20) (40) were killed.
- 7—Easter this year falls on (April) (May) 1.
- 8—Reds recently returned strategic sea-air base of Porkkala to (Italy) (Finland).
- 9—(Japan) (Korea) is urgently asking United States for atomic weapons.
- 10—"Mardi Gras" means, literally (carnival) (fat Tuesday).

Count 10 for each correct choice. A score of 0-20 is poor; 30-60, average; 70-80, superior; 90-100, very superior.

Decoded Intelligram

20. 7—April. 8—Finland. 9—Korea. 10—Fat Tuesday. 1—India. 2—Language. 3—Has. 4—Diesel. 5—Los Angeles. 6—

Canadian statistics report

(A Weekly Review)

Foreign Trade: Commodity-wise, the increase in Canada's domestic exports to the end of November last year was due largely to substantial gains in primary and semi-processed metals and minerals. Forest products and chemicals also made significant advances. . . . Securities trade with other countries to the end of November resulted in a net capital outflow of \$18,000,000 compared to an inflow of \$63,000,000 in the same 1954 period.

Manufacturing: Factory shipments of Canadian-made motor vehicles totalled 453,623 units last year, well above the 1954 total but short of the record of 480,959 units in 1953. Passenger car shipments, however, set a new record at 374,761. . . . Year totals show increases over 1954 in shipments of such building materials as mineral wool, rigid insulating board, asphalt and vinyl-asbestos floor tiles, and in sales of electric storage batteries.

Housing: New dwelling units completed rose an estimated 27 percent in the first 11 months last year over 1954, starts were up 23 percent, and the number of units under construction to the end of November was 16 percent greater than a year earlier.

Transportation: Net deliveries of oil through Canadian pipe lines were some 29 percent greater in the January-November period last year than in 1954.

Labor: Initial and renewal claims for unemployment insurance and benefit payments rose in December from November but were substantially lower than a year earlier.

Prices: Canada's general wholesale price index rose 0.3 percent in December over the preceding month to reach a level 2.8 percent above a year earlier. . . . Residential building material prices averaged over 3 percent in December than 12 months before, and non-residential building material prices were close to 4 percent higher.

Britain's Prime Minister Eden opens visiting VIP season in Washington

By FRANKLIN JOHNSON
(Staff Writer for CPC)

WASHINGTON.—The arrival of Britain's prime minister Sir Anthony Eden in Washington at the end of January for a White House visit and conference with President Eisenhower inaugurated the 1956 "very important person" visiting season in the American capital.

The next VIP will be President Giovanni Gronchi of Italy, arriving February 28 for high level Italian-American policy talks and a round of social functions, but in deference to the President's convalescence from his heart attack, the list this year is expected to be relatively slim.

After all, the strain of having such official guests is said to be a duty which the President can shed least easily, because foreign dignitaries of the first rank find it damaging to their prestige if they do not see the No. 1 man.

That such visits are a strain on the Chief Executive is not surprising to anyone here, because they add tensions for a lot of people, notwithstanding the State department's suave and effective John Simmons, who as chief of protocol does everything possible to smooth the way.

The visit last June of Prime Minister U Nu of Burma demonstrated what headaches result from the fact that "the best laid plans of mice and men oft gang a-glee." The big one was when he and his party, escorted by Simmons himself, arrived on the dot of 4 p.m. to see Agriculture Secretary Benson. The secretary's timing was off, however, and after a five-minute wait, U Nu left.

Closing elevator doors brought a futile chase by Benson's aides, and there was nothing to do but for Benson and his wife to rush to the Blair House, the capital's official "guest room", at the dinner hour to try and make amends. Mrs. Benson had lunched with Mrs. U Nu that same day.

It was hardly a secret that in the prior January, the State department had tried to sidetrack the Burma chief's visit, when in traditional diplomatic fashion he first began hinting that he would welcome an invitation.

U Nu is very highly regarded here, but in high circles the thought had developed that the parade of visitors had become so

Prime Minister Eden "Knows Ike Already"

hectic that some costly slips might be made. Come June, however, and U Nu was here, and the slips indeed were made.

Visitors in the preceding months had included Prime Minister Yoshida of Japan, President Celal Bayar of Turkey, Prime Minister Mohammed Ali of Pakistan, Prime Minister Mustafa Ben Halim of Libya, President Remon of Panama, the king and queen of Greece, Chancellor Konrad Adenauer of Germany, Queen Mother Elizabeth of Britain, Prime Minister Winston Churchill, Premier Mendes-France of France, Chancellor Raab of Austria, President Tubman of Liberia, Vice-President Radhakrishnan of India, Prime Minister Kotelawala of Ceylon, General Vukmanovich of Yugoslavia, and Minister of Foreign Affairs Schrei-

ber of Peru. All got the red carpet treatment with the full works.

To cope with the new influx of visitors, however, routines have been developed. When large crowds are wanted, as during the state visit of Emperor Haile Selassie, government workers are let out early. Washingtonians get details of the parade routes of visiting dignitaries in their daily papers so they will know where to come to see and, it is hoped, applaud them.

The Washington version of sending your house guests out to see the local sights so you can get a breather is to route them out through the country.

This has its complications for the State department, too, and the story goes that when Simmons accompanied President Syngman Rhee of South Korea and Jameson Parker, also of the department's protocol office, ushered around Lt. Genevieve de Galarde-Terraube, the "Angel of Dien Bien Phu", their paths chanced to cross in the lobby of a Chicago hotel and it was the first time they had seen each other in two years!

The potentialities of things going wrong are infinite, and make the protocol experts haggard. Luck is the time the manager of a supermarket being visited by the wife of Pakistan's prime minister on an impulse presented her with a ham, not knowing she does not eat pork.

Emperor Haile Selassie, trying to fathom the mysteries of baseball, witnessed one of Casey Stengel's outbursts in Yankee Stadium, New York, and wanted to know why he was ejected by the umpire. Local socialites were miffed because Perle Mesta ignored the advice of protocol experts that she need not curtsy to Queen Mother Elizabeth.

There was even a little hitch in plans for the forthcoming Eden visit, because the prime minister made some reference to it in a news conference before it was announced, and White House press secretary James Haggerty, in announcing the visit officially, had to explain that Eden did not suggest it.

However, Eden is considered a particularly good VIP to help the President back into that activity after his illness, "because he is just like 'an old shoe', you know, and knows Ike already."

Besides Eden is an old hand at playing his part, having accompanied Churchill in 1951, and then having made a trip on his own as foreign secretary.

GOAT 'BUTTS' ALARM

Many a dog has saved its master and family from a burning death, by sounding a fire alarm. And now comes the story of an alarm turned in by a goat.

In Holcomb, New York, a farmer was rudely awakened from sleep by a loud banging on his back door. When the farmer got up to check, he discovered a fire raging on the property adjoining his. And the informant? A goat, which had insistently butted the door until it was opened.

Inclusion of alfalfa ups yield

OTTAWA.—The advantage of providing high quality forage for livestock is becoming widely recognized by livestock producers, says R. N. McIver, Indian Head Experimental Farm, Canada Department of Agriculture.

Some native pastures are being cultivated and sown to forage as well as some cultivated land which was previously used for grain production.

At several of the illustration stations in southeastern Saskatchewan various forage mixtures have been under test during the three-year period 1953 to 1955 inclusive. A number of grasses and grass mixtures with and without alfalfa have been included in the test.

In general the grasses alone yielded about .75 tons of dry matter per acre. The addition of two pounds per acre of alfalfa to the grass increased the yield to about 2.0 tons per acre during this period. As well as a higher yield the alfalfa greatly increased the nutritive value of the forage.

The importance of including a small amount of alfalfa in the forage mixture for either hay or pasture cannot be over-emphasized. Very little difficulty from bloat has been encountered when using this mixture for pasture, providing the livestock are allowed to graze on it continuously.

A very suitable hay or pasture mixture for Southeastern Saskatchewan would consist of Bromegrass eight pounds and Ladak alfalfa two pounds per acre, or Intermediate Wheat grass 12 pounds and Ladak alfalfa two pounds per acre. During seasons with favorable moisture conditions two cuttings can be taken.

Crested wheat grass starts growth very early in the spring. Hence it is often advantageous to seed a small area to a mixture of Summit crested wheat grass and Ladak alfalfa for early spring pasture. The livestock could be removed from this field when the forage in the main pasture fields has made a good growth. The mixture of crested wheat grass and alfalfa could then be cut for hay later in the season.

Fertilizers in corn grain production

OTTAWA.—Results of the 1955 corn trials show that the use of fertilizers is essential for producing the best corn yields in Manitoba. Tests conducted co-operatively at Morden, Brandon, and Winnipeg, according to John Giesbrecht, Experimental Farm, Morden, Man., show that 80 to 100 pounds of 16-20-0 per acre will give a better yield and lower ear moisture than any lower rate. Results also indicate that the 16-20-0 fertilizer is superior to the 11-48-0 for corn grain production.

The practice of most farmers is to use corn as a summerfallow substitute. As a result it is usually grown on land following several cereal crops. This land is generally low on available nitrogen. The extra nitrogen of the 16-20-0 fertilizer as compared with 11-48-0 is therefore highly beneficial to the corn crop.

The practice of applying part of the fertilizer as a side dressing in early July showed no advantage over the standard procedure of making the complete application at planting time.

Studies on rate of seeding at Morden, Brandon, and Winnipeg indicate that the plant population per acre in the past has been too low for maximum corn yield. These tests reveal that four plants per hill (checked at 42 inches) will yield significantly more than the common practice of growing three plants per hill. It was also found that for drilled rows 42 inches apart, the plants within the row, when spaced at 10 to 12 inches, yielded more corn grain per acre than any lighter seeding rate.

BIG INCREASE

The first bull sale in Alberta was held in Calgary in 1901 with average price of \$87.17 per animal as compared with an average sale price of \$342.00 in 1955. 3181

RED CROSS Reports to you who give

PICTURED above is another phase of your Red Cross in action. Swimming instruction as well as recreation in the water is being provided once a week by trained volunteer Red Cross instructors in Regina for a group of young people who have been crippled by Polio or Cerebral Palsy. These young people are going to be able to swim in spite of their disabilities. Red Cross has been a pioneer in the field of treatment and rehabilitation for crippled children. The first patients were accepted in 1919. Since then well over 6,000 Saskatchewan boys and girls have been given medical care and treatment, which might otherwise, have been denied them. The Junior Red Cross makes the

aiding of handicapped children one of its major projects. In 1949, the Juniors, together with the Senior Society, provided the funds for a beautiful 56 bed hospital in Regina for their less fortunate brothers and sisters.

The above class is only one small part of the Swimming and Water Safety Programme, for during the past year, Red Cross instructors taught more than 17,000 pupils at 90 points in the Province. Instructors are given a 30-hour course in teaching methods at the Society's expense. This programme, and 15 other services are, of course, made possible only through the generosity of all Red Cross supporters.

OUR COMPLETE SHORT STORY—

thunder shower

—By NORMA MOSHER

JOAN ROBERTS called me the other day. Rather surprisingly, for I hadn't seen her in years, and after the usual exchanges, "How are you? It's too bad we don't see one another more often," she got down to the point.

"Did you know your cousin Ethel was being married next month?"

"I was aware of the fact," I replied, rather grimly. "I've already been to three of her showers."

"Well, since I'm to be a bridesmaid, I simply have to have one, too. I've decided on next Tuesday, and I thought you might like to come."

"Do you? Have to have one, I mean. It seems to me that Ethel has done rather well for herself. Her father has built her a house, and her friends seem to be furnishing it for her."

"Oh, Grace, you always were such an odd person. No wonder you and Ethel never got along. She's naturally expecting me to have a shower for her, and I'm expecting you to turn up, because you know how people talk, and of course I want just as big a turnout as the other girls have had."

Well, I couldn't give much of an argument to that one, so it was settled. I was to come on Tuesday, with "nothing too extravagant now, just a little remembrance."

This was a "miscellaneous" shower, which, as everybody knows, means that you can bring anything from the book-ends Aunt Hattie sent you for Christmas to the pillow slips you picked up during the January sales for \$1.98. Our household, unfortunately never seems to yield any hidden treasures at the right moment, so I bought a rose bowl at the little gift shoppe up at the corner, thinking that Ethel's husband could use it as a brandy sniffer in an emergency, and, if I knew Ethel, he would need it.

I didn't get it wrapped until the last minute, as usual, and, as usual, I found that there wasn't a bit of fresh ribbon in the house. I finally made do with some taken out of the baby's sweater, and freshly pressed, it looked fairly presentable, although the bow was rather flat.

But I still had the pearls to wrap up. Much as I disliked the idea, I had to pass them along to the next bride in the family—although Ethel didn't seem like family to me, because until recently we hadn't seen her in ages. I didn't even know whether she remembered the pearls, but the shower would provide a good opportunity to give them to her. So I did them up the best I could, not forgetting the little card that always went with them.

I arrived fairly early, hoping to get a few words with Joan about the good old days when our hearts were young and gay, but her time was pretty well taken up receiving and introducing the various guests. I smiled vaguely around the room, making the usual remarks about the weather and the way prices were going up. The odd familiar face took stock of my dress, figure, and hair-do, and I was glad that I'd taken time to manicure my nails that afternoon.

You know the old routine by

Itch..Itch...I Was Nearly Crazy

Very first use of soothing, cooling liquid D. D. D. Prescription positively relieves red itchy—caused by eczema, rashes, scalp irritation, chafing—other itchy troubles. Greaseless, stainless, 39c trial bottle must satisfy or money back. Don't suffer. Ask your druggist for D. D. D. PRESCRIPTION.

Don't Neglect Slipping FALSE TEETH

Do false teeth drop, slip or wobble when you talk, eat, laugh or sneeze? Don't be annoyed and embarrassed by such handicaps. FASTEREETH, an alkaline (non-acid) powder to sprinkle on your plates, keeps false teeth more firmly set. Gives confident feeling of security and added comfort. No gummy, rosey, pasty taste or feeling. Get FASTEREETH today at any drug counter.

YOU CAN DEPEND ON

When kidneys fail to remove excess acids and wastes, backache, tired feeling, disturbed rest often follow. Dodd's Kidney Pills stimulate kidneys to normal duty. You feel better—sleep better, work better. Get Dodd's at any drug store. You can depend on Dodd's.

now. When the scout posted at the door to watch for the guest of honor called "Here she comes!" the lights were turned out, and there was comparative silence broken only by a few giggles from the 'teen-agers. Then, as Ethel stood in the doorway, everyone yelled "Surprise!" on went the lights, and she put on a fairly convincing display of amazement—

"Really, I didn't dream—I hadn't the faintest idea—Joan just asked me over because Harry was going bowling tonight—a shower for me!" while we all knew very well that she'd been in on things from the start.

Well, she finally got settled on the little stool under the huge white bell, with the usual pink paper streamers flowing around her. Then the real business of the evening began. It looked like a pretty lengthy session, because there were two laundry baskets (covered with pink paper, of course) full to the brim with be-ribboned packages. I thought that Joan had done a pretty thorough public relations job this time, and the take was going to be considerable.

We all sat around in the usual circle, with Ethel opening the gifts and Joan reading the accompanying cards. Then they were passed on to be duly admired and exclaimed over, and returned via the circle to Ethel. The donor of the seventh gift, by tradition to be the next bride, turned out to be a stoutish matron who lived down the street and had three strapping half-grown boys.

The tissue piled up around her feet, the ribbon piled up around her neck. Why do they always hang the ribbons around their neck? That's one I've never been able to figure out. Everyone else, as well as Ethel, was running out of adjectives, but she certainly wouldn't run out of oven-proof ware for a long time to come.

It was getting late, and we were hopefully sniffing the fragrance of the coffee brewing in the kitchen when Ethel reached 'way down for the last package. The white paper and red cord looked rather plain after all the other pretty wrappings, and I was sorry that I hadn't taken time to dress it up a little. "This must be something extra," Ethel said, giving away the fact that all present and all presents had been accounted for in her busy little mind.

She gave an embarrassed laugh when she saw the shabby box, anticipating another joke. But when she opened it, there was only the string of small, well-worn pearls. Not real ones, of course, but well matched and graded. As Joan read the card, a burst of incredulous laughter rose throughout the room.

"A pearl for every year of happiness when you wear these on your wedding day." Why, it isn't even signed!"

Ethel's voice was shrill over the buzz of comments in the room. "This must be a joke. As if I would wear those—those pearls with my wedding gown. I think the person who did this should own up. And I have a pretty good idea," turning and looked pointedly at me, "who it is."

I stood up. "Why of course, Ethel, I'll own up," I said quickly. "And I did hope that you might wear them at your wedding. But I can see that it was a mistake on my part, and I'm truly sorry for what I did. But there's one consolation," I couldn't help adding when I saw the look of triumph in her eye. "You'll not get a duplicate of these at another shower. You see, they belonged to our grandmother."

WORLD HOCKEY TROPHY—TCA stewardesses Dolores Evans and Bette Youmans hold World Ice Hockey Trophy, which was in their custody for delivery to Cortina, Italy, and the World series which was played in conjunction with the Olympic Games. It was won last year by Penticton Vs and by Russia in 1956.

A swallow-tail is a full dress coat. Fingal's cave is on a Scottish island.

New program helps homebound handicapped

Many of Saskatchewan's handicapped citizens are unable to leave their homes or to go out into the world to seek regular employment.

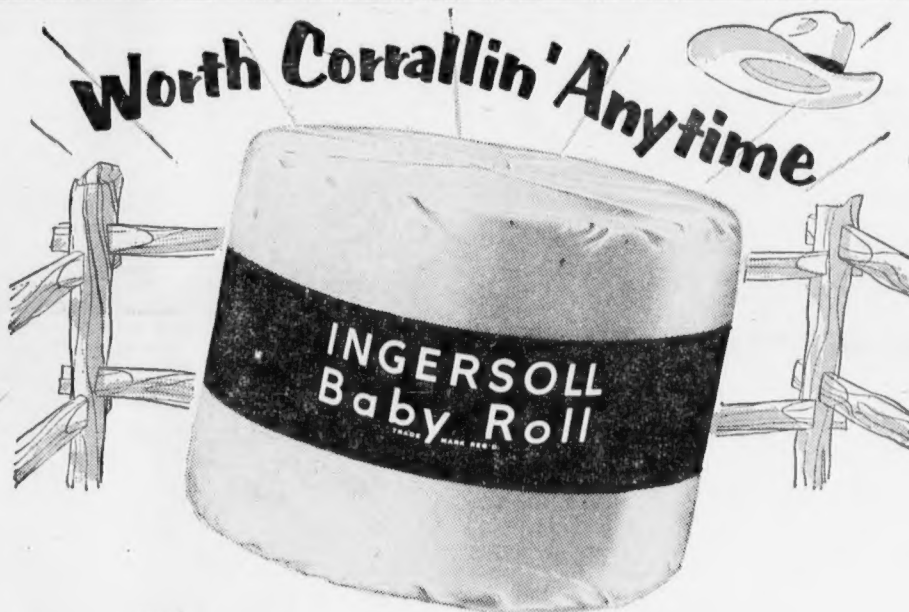

To answer their needs, a new March of Dimes service, known as the "Homebound Program", has been established and is growing rapidly. At the present time, more than 60 handicapped individuals are participating in this program and many others are being contacted.

Through this homebound program, these handicapped citizens are able to obtain work which they may carry on in their home. They are provided with the material and equipment needed for a particular job. As they produce the articles required, they send them in to a central office in Moose Jaw where they are sold, either on a contract basis or through a retail outlet.

Articles made by handicapped participants in the home include, leather work, stuffed toys, jewelry and other special articles. In all cases, the individual is paid for his or her labor on the finished item when it is sold, thus enabling the individual to gain at least some financial independence and satisfaction in knowing that, they too, can be productive citizens of our community.

Handicapped people interested in obtaining further information on this program are invited to contact the Handicapped Citizens Association, 506 Scott Block, Moose Jaw.

There are no known snakes in Ireland.

The favorite Cheese of the Golden West

For a hunk o' wholesome goodness there's nothing like Ingersoll Baby Roll, the pasteurized process cheese that's made from fine, well-aged Canadian cheddar. For a party snack — or a between-meal bite — rope yourself some Ingersoll Baby Roll.

Waite, Miss Cindy Trumbly both of Mission City, B.C.; Mrs. Joseph Paul of Findlater, Sask.; seven brothers Jack, Saskatoon; William, Mission City; Peter, Regina; Robert of Demaine, Sask.; Norman of Swan River, Man.; George, Toronto, and Chris of Moose Jaw.

Services were conducted on Monday at 4 p.m. from Jacques Funeral Home by Rev. R. Mackay Esler with interment following in Mountain View Memorial Gardens.

Mr. Ted Schmidt of the Alberta Pacific Grain Company Limited at Carbon, Alberta has gained the distinct honour of being numbered amongst those who have won the Twenty Year Elevator Master Merit Certificate. This is the highest award given by Grain Insurance and Guarantee Company and is granted in recognition of outstanding proficiency in the maintenance of grain elevator premises. The award is only granted if an agent has a perfect record for a period of twenty consecutive years.

Inspections of all plants insured by Grain Insurance and Guarantee Company are carried

out by Affiliated Inspection Bureau Limited which has for the past twenty years majored in the inspection of grain elevators, flour and feed mill properties, etc. The Bureau's inspection service is ecknowledged by all as being extremely thorough and rigid. Winning the award is therefore recognized as an outstanding achievement by the grain trade and fire prevention authorities throughout Western Canada.

BOY SCOUT ACTIVITIES

By the S. M.

The following boys passed their Electricians Badge on Saturday. Patrol Leader Dale Gimbel, Patrol Second, Maurice Johnson, Patrol Second Garry Johnson, Ronnie Gieck and Archie Ohlhauser. If anyone has good reason to commit suicide by electrocution, any one of these boys will gladly assist you.

Our Troop Leader has completed his third qualifying badge for the Queen Scout Badge, and has the fourth and last to get. Tommy Downes gave us a few items on the accordion. He plays well—very well.

The other day I had one of the boys staying with me, and in helping me to lay out the supper, he opened a can of milk wrong-end-to. It was rather an-

noying as all of the milk came out of the can upside down. By the way, we have had far too much cold weather this winter as you will all agree, and on one of the coldest days I spotted Mr. Walter Steeves, our druggist, accidentally upset a pail of water on the sidewalk just as Ronnie Fox stepped into the puddle. Ronnie promptly froze in his tracks and has been there ever since. Don't worry, folks. We'll thaw him out in the spring. How about a Carbon Liars Club? I am willing to run for the presidency.

All joking aside, though, this winter has been really frumious. If you don't know what 'frumious' means, do not ask me as I don't know either. I well remember the first winter I was in Carbon, 1927-28. We had the usual month of bitterly cold weather and then one morning when it was 35 below at 10 a.m. a chinook arrived and by 4 p.m. the temperature stood at 70

above. It was the warmest chinook that I have ever experienced through the years. The snow was about 18 inches deep and it went down so fast that it left a hole in the ground, and three of my neighbors had to move out—You can't farm a hole in the ground, you know.

Bye now.
